EXPERIENCE

Goody Technologies

2016 - 2019

Frontend Developer & UI / Web / Graphic Designer

- create front-end and back-end UI design with Bootstrap Framework.
- create UI components and convert UI design into Laravel Blade Template.
- create front-end build tool with (NodeJS, Grunt, Bash) that works with HTML and Laravel Blade template. To manage and automate build CSS and JS in a modular way. Such as minifying, concatenating module files, and generates different asset distributions for different user agents.
- create CLI tool (Bash) to automates the front-end boilerplate, including HTML, Laravel Blade templates.
- create a CLI tool (Bash) to add a new project in the Docker.
