UI Designer
Software Engineer
Electronic Engineer

LOOUIS LOW

39 Year

ABOUT ME

II have worked in an embedded system domain for ten years. I am primarily prototyping Electronic applications for Automation, Monitoring and Signal Processing. I also make UI Designs and Frontend-Dev for Embedded Applications, Web Apps, Websites, TV Apps, Mobile Apps, and as well as Graphic Designs to create materials for marketing and user interface.

EXPERIENCE

dogsbark
2004-2020

Software Engineer (architect) — Canada
Embedded Design, Firmware Design, Prototyping and Automation. Machine Learning and Sound Effect middleware engineering.

Goody
2016-2017,
2018-2019

Software Engineer (frontend) — Malaysia
Craft UI Material Design & UI Design System. Pure CSS FX without JS. Create custom frontend devtools and boilerplates with added CLI automation.

Internet Mastermind
2014-2015

Software Engineer (frontend) — Malaysia
Implement UI and UX for marketing applications with Bootstrap UI framework. Frontend and Backend UI prototyping. Custom landing page web design for marketer.

EDUCATIONS

Shrewsbury College
2008-2009

Visual Art & Design — UK
I also am artist. I gave myself a chance to step into a little bit deeper into the art. Also, I am a perfectionist either in UI or UX.

Univ. Manchester
2002-2005

Electrical & Electronic Engineering — UK
I was always wanting to be an inventor like robotic, anything since I was a little kid. But, well, they all came true. I just kept doing it. Never stop.

Chung Ling H. S.
1995-2000

Form 5 — Malaysia
Just an ordinary student not very fond of school subjects, beside the computer programming and science classes. Never a good chance in Art class.

SKILLS

Embedded Development
Linux, Prototyping

Software Development
Essential for Eng.

Electronic Development
Firmware Design

Project Management
Kanban, Automate

Web Development
Frontend, Modular

Design
UI Design, Component Design, Material Design
